

Splash & Antunes

A Partnership that Makes a Difference

THE PROBLEM

Kids & Unsafe Water

Access to water isn't enough; it has to be clean. Safe water is critical to closing health and development gaps.

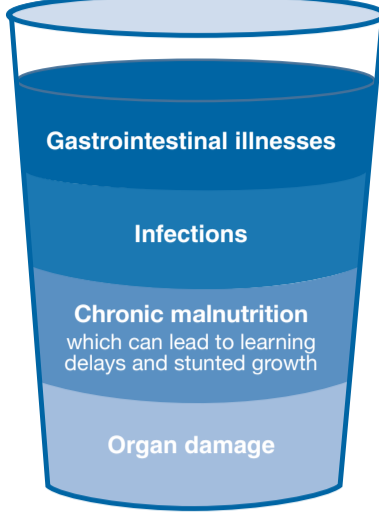

Unsafe water affects kids the most:

Over 90% of deaths from water-related illness are children.

Risks of Contaminated Water

THE SOLUTION

Splash

A nonprofit organization providing clean water and hygiene programs to children around the world

Antunes

A family owned and operated company specializing in the manufacturing of foodservice equipment and advanced water treatment solutions

Every day nearly 300,000 children are drinking clean water thanks to the work of Splash and the reliable water filtration systems from Antunes

300,000

Where Splash Has Installed Antunes Water Filtration Units

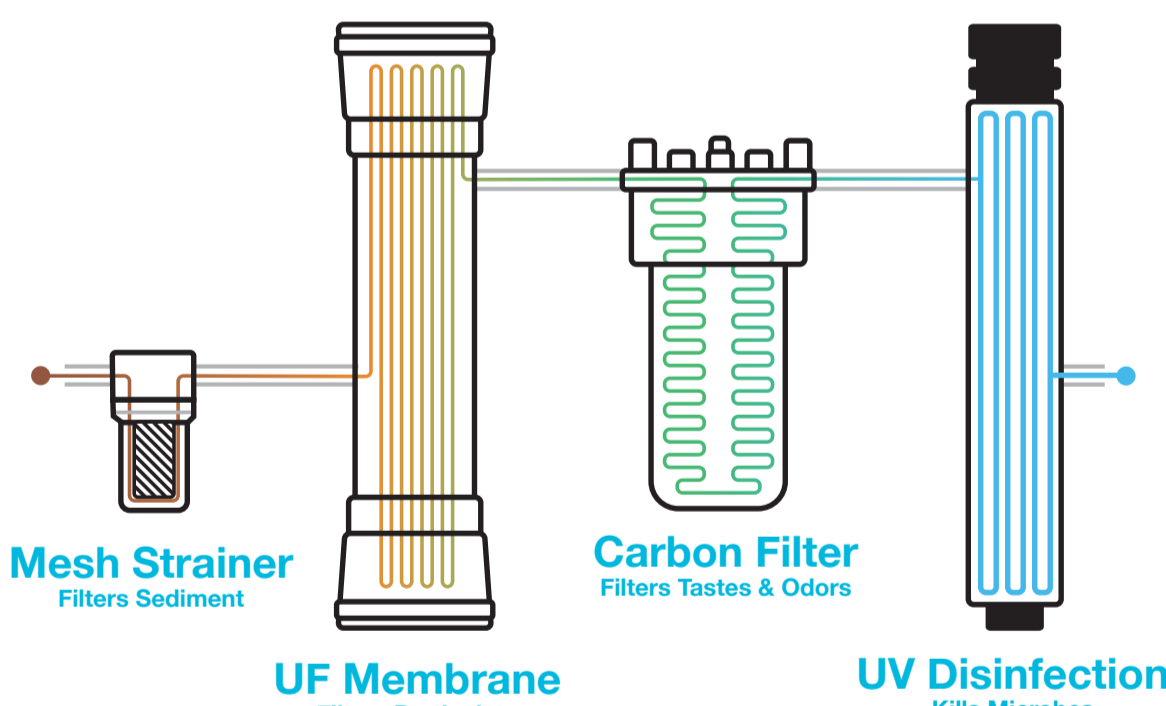

THE LOCATIONS

Where Water Filtration Systems are Installed by Splash

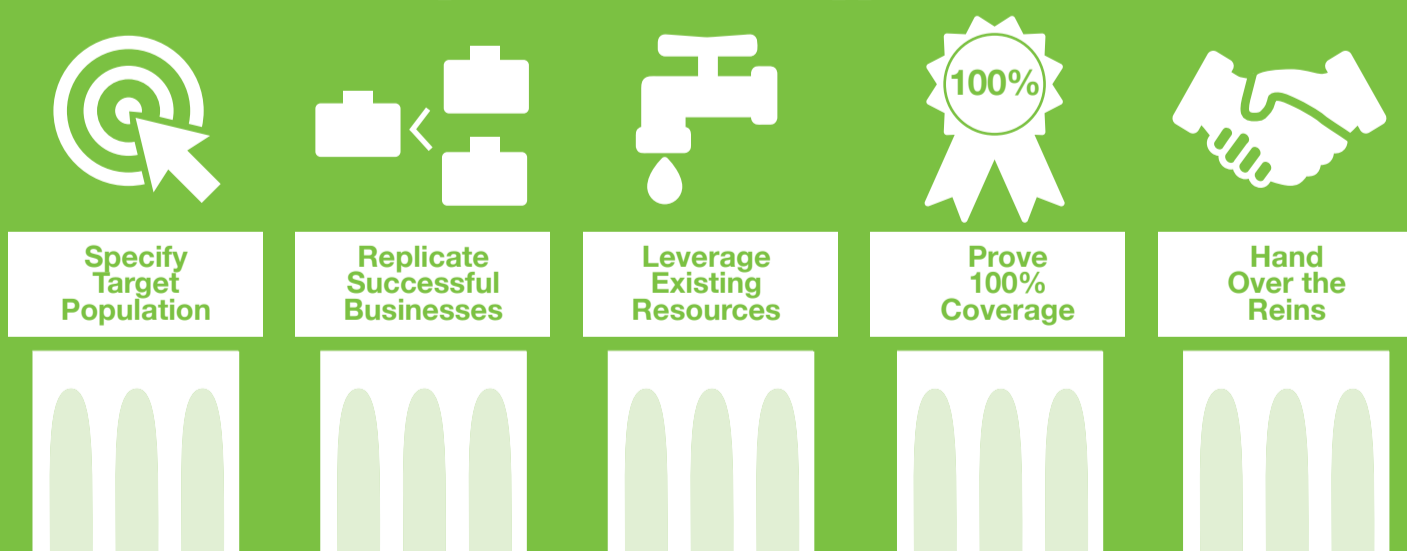

HOW THE SYSTEM WORKS

THE STRATEGY

Splash's Five-Pillar Approach

THE RESULTS

99.4%

project success rate and Splash's continuing commitment to its goals

Local Ownership

Splash doesn't seek to "export" an intervention, but instead to be a catalyst for locally rooted, sustainable solutions.

Better Health

Clean water is not an end but the means to reach the goal of better health and development for the kids Splash serves.

Theft

Its goal is scale; therefore, Splash promotes the theft of its model, encouraging others to replicate and improve upon it.
